

# Different User Types

1. **Admins** - The admin is the person responsible for opening up the account. They will be the only one that can handle payments and payment information. The admin can invite other users (Admins, Managers and regular Users) to join. Admins are able to see all aspects of the app. The Admin also controls the cloud settings.
2. **Managers** - Managers can invite other Managers or regular Users and can see the business information but cannot see the payment information.
3. **Users** - A user can perform tests, check out saved tests and export tests.

**Note:** All types of users can perform tests, check the history of saved tests and export tests.
